Citadel is seeking an EHS consultant to add to our Industrial Hygiene and Safety team. This consultant will be instrumental in supporting our clients in the Los Angeles, Orange County and San Diego markets. You have the opportunity to be based out of Citadel's office in Costa Mesa or Glendale and occasionally working from home if desired and where it makes sense. You must have technical consulting skills in industrial hygiene and preferable safety.

Citadel is a growing, family-oriented company that values integrity, trust, and excellence. We are a 100% employee-owned company. We empower our employees to work together as a team for the good of our clients and each other.

This position will focus on industrial hygiene consulting, including developing IH strategies, conducting exposure monitoring, and performing IAQ/moisture investigations. In this position, you will also have opportunities to develop and implement written safety programs, conduct assessments, develop and perform trainings, and support our clients to help them improve their EHS performance. This position will also require project management and client management.

The ideal candidate should have 5-10 years of experience in industrial hygiene and safety. Some consulting experience is preferred. Industry experience in healthcare, pharma, medical device, technology, or manufacturing is desirable. Excellent verbal and written communication skills, including writing technical reports are critical. Certifications including CIH and CSP are highly desirable.
